New fake servers

Andrey, Saturday 10 December 2011 - 08:03:14

Over the last month the network has several fake servers that use the name of good popular servers (eDonkeyServer No2, eMule Security 1-4):

88.190.20.114:4661

88.191.64.238:8100

88.191.75.3:4661

88.191.84.246:4661

88.191.116.134:4661

88.191.125.36:8100

88.191.147.91:4661

These servers are not index files and sources and the search does not work when connected to them. Please do not use them.
